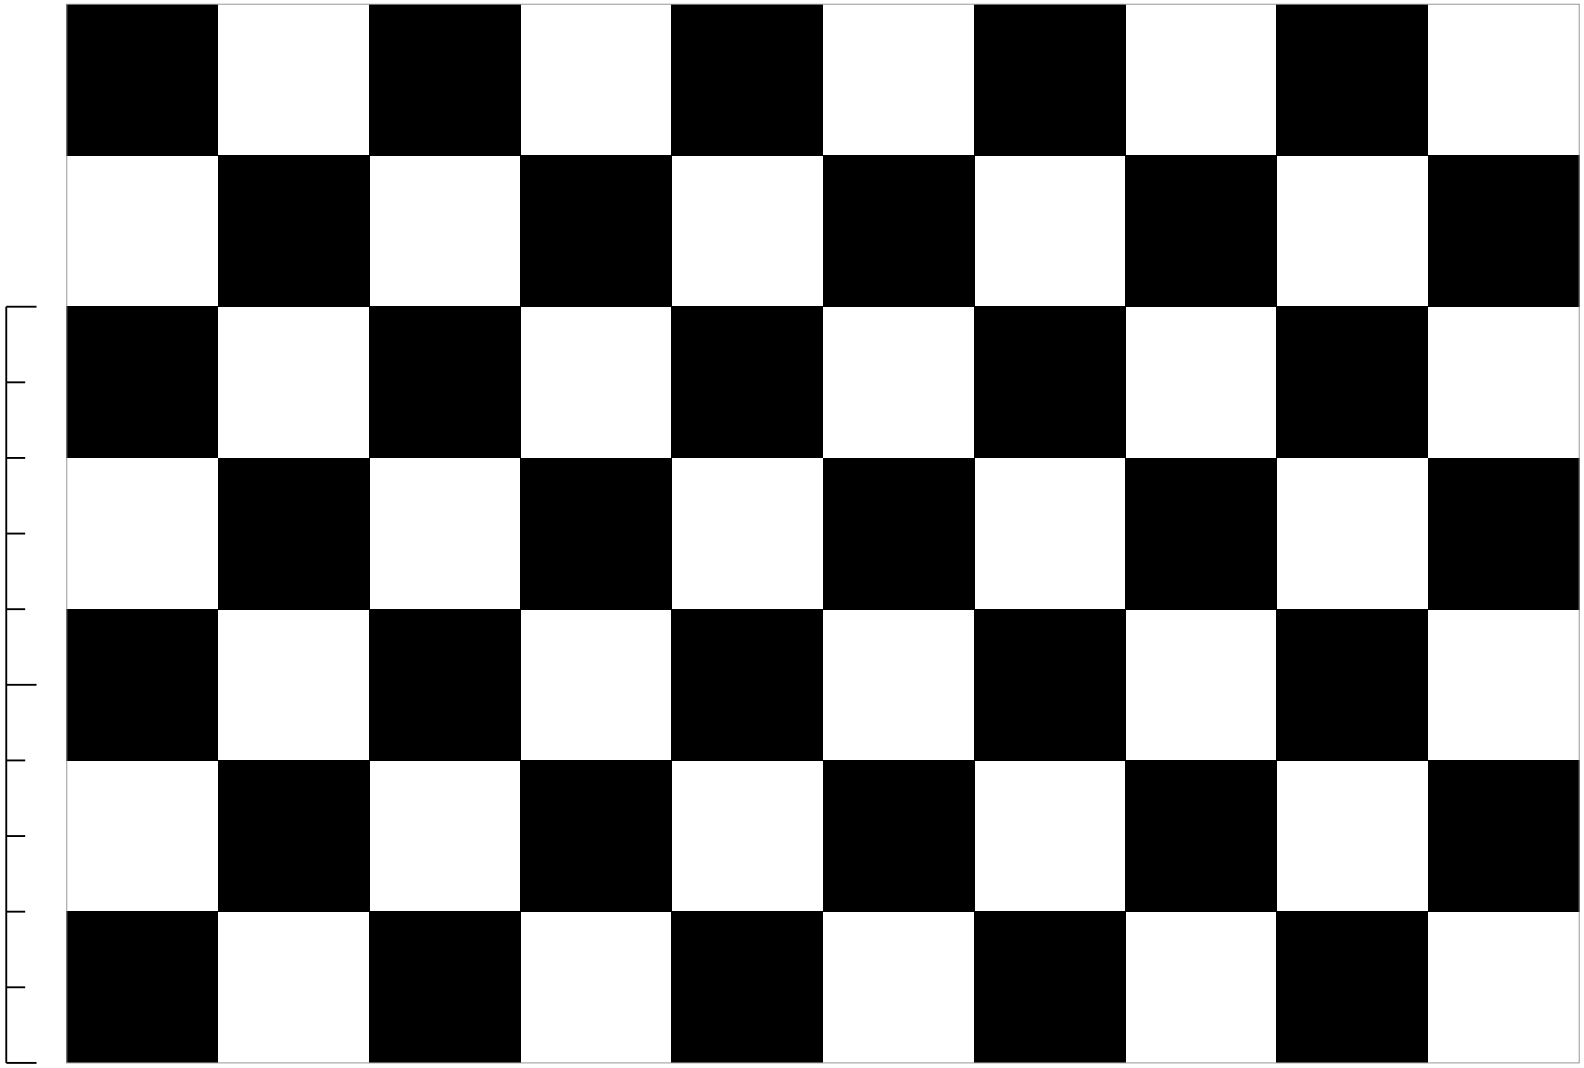
WATT City - camera calibration target

A4, landscape

9 x 6 INNER CORNERS | nominal square = 20.00 mm | PRINT AT 100% / ACTUAL SIZE - do NOT use Fit to Page



This line must measure exactly 100.0 mm (3.937 in).

If it does not, reprint at 100% scale. Do not proceed.

AFTER PRINTING - measure and record:

10 squares span (caliper): _____ mm -> square = span / 10

Pass this to --square in calibrate_xiao.py: _____ mm

Measure across 10 squares, not one - it divides your caliper error by ten.
